📍 Trujillo - Perú

EXPERIENCE

FullStack NodeJS Developer

Riqra

📅 02/2018 - 08/2019 📍 Lima - Perú

Riqra is a Peruvian Startup dedicated to automate the B2B/B2C purchases in LATAM, through a software as a service offered to vendors.

- Developed the most recent version of the e-commerce platform, support general and specific features for each replicated instance of our customers.
- Implemented and maintain features for our GraphQL API, and also adding improvements for the handling of web transactions.
- Integrated third-party systems with our API, in order to maintain both environments updated, implementing an integration server based on data flows.
- Developed the UI components library for the design system of the company, being in constant evolution due the use of that in different projects.

Android Developer

Wando

📅 07/2016 - 06/2017 📍 Trujillo - Perú

Wando is a Peruvian Startup dedicated to build software and branding consulting.

- Learned to use new technologies based on Beacon devices and the NFC protocol as member in innovation technologies demonstrations.
- Used the potential and robustness of Firebase as infrastructure, also using services of Fabric.io like Crashlytics and BetaTesting.
- Maintained software for an Android application about order taking, using libraries like Dagger2, Retrofit, Requery and RxJava2.
- Designed and implemented software for a corporation project named Delivery.

Hyperbola - Integration Server

📅 12/2018 - 08/2019 📍 Riqa

Integration service between the GraphQL API and third-party systems in order to keep updated both environments.

- Based on schemas that defines the data flows of the integration operations. *(Inspired by parabola.io)*
- Had the responsibility to execute CRON jobs to synchronize the products catalog.
